

Spring - Year 6

This half term seems to have flown by! As well as working hard in Maths and English as we approach SATS, we have been enjoying lots of exciting learning in the wider curriculum.

Science

In Science, we have been exploring 'Light' and the uses of it. Throughout this topic, through the use of investigations and practical experiments, the children have discovered how light travels, how reflections and shadows are created, how colours are made, for example rainbows, and how we as humans are able to see light. We thoroughly enjoyed this topic as we carried out lots of practical experiments to enable us to really understand and physically see how particular things happen and why, for example reflections, shadows and creating rainbows.

Daily PESSPA

In our daily PESSPA sessions, we have been focusing on skipping skills. We have had to work hard, developing our hand-eye co-ordination. We enjoy challenging ourselves each week to see if we can beat our personal bests.

PE - Adventurous Activities

This half term, we have taken part in activities to challenge us mentally and physically. We had to use teamwork and communication to help our teams succeed. We loved the challenge of getting across the hall without touching the floor.

History/Geography

This half term Year 6 have made great progress with their historical and geographical knowledge. In history the children have been learning all about sources of evidence and how we can test the reliability of these.

In geography, we have been learning all about field work and have carried out their own enquiry questions, as well as conducting field sketches, environmental drawings and graphs to record findings.

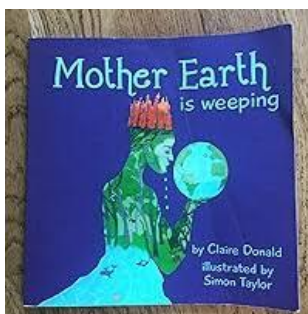

Art

In Art this term, we have been learning about lino printing, taking inspiration from the artist Angie Lewin. We designed and created our own lino tiles with an Easter theme, then printed the tiles to make our own Easter cards.

World Book Day 2025

Year 6 loved World Book Day 2025 this year: focussing on the book 'Mother Earth is Weeping'. Year 6 enjoying coming into school wearing 'recycled' costumes and thinking about the different things that we can do daily to help our planet.

Prom Prep/Easter Egg Sales

We also had good fun raising money for our leavers hoodies by holding an Easter egg raffle. We raised lots of money by selling raffle tickets. Congratulations to all the winners!

What another AMAZING, jam-packed half term!

Well done Year 6!
