

Illness and Accident Policy

At Mighty Oaks Before and After School Club we will deal promptly and effectively with any illnesses or injuries that occur while children are in our care. We take all practical steps to keep staff and children safe from communicable diseases.

All parents/carers must complete the **Medical Form** (within the 'Contract of Agreement') when their child joins the Club, requesting permission for emergency medical treatment for their child in the event of a serious accident or illness.

We will record any accidents or illnesses, together with any treatment given, on an **Accident/Incident/Illness Report Slip** as appropriate. More apparent serious accidents are to be reported to the school's health and safety officer. If a head injury occurs, parents/carers must be notified.

Mighty Oaks Before and After School Club cannot accept children who are ill. If any children are ill when they first arrive at the Club, we will immediately notify their parents/carers to come and collect them. Any children who have been ill should not return to the Club until they have fully recovered, or until after the minimum exclusion period has expired (see table at the end of this policy).

First aid

The designated First Aider has a current first aid certificate and has attended a paediatric first aid course. A qualified first aider will be present and available at all times when the Club is running. We will take into account the number of children and layout of the premises to ensure that first aiders are able to respond quickly to any incident.

The location of the first aid box and a list of qualified first aiders are clearly displayed at the Club. The designated First Aider regularly checks the contents of the first aid box to ensure that they are up to date, appropriate for children and comply with the Health and Safety (First Aid) Regulations 1981.

Procedure for a minor injury or illness

The first aider at the session will decide upon the appropriate action to take if a child becomes ill or suffers a minor injury.

- If a child becomes ill during a session, the parent or carer will be asked to collect the child as soon as possible. The child will be kept comfortable and will be closely supervised while awaiting collection.
- If a child complains of illness which does not impair their overall wellbeing, the child will be monitored for the rest of the session and the parent or carer will be notified when the child is collected.
- If a child suffers a minor injury, first aid will be administered and the child will be monitored for the remainder of the session. If necessary, the child's parent or carer will be asked to collect the child as soon as possible.

Procedure for a major injury or serious illness

In the event of a child becoming seriously ill or suffering a major injury, the first aider at the session will decide whether the child needs to go straight to hospital or whether it is safe to wait for their parents/carers to arrive.

- If the child needs to go straight to hospital, we will call an ambulance and a member of staff will go to the hospital with the child (this could be a school or Club representative depending on the time of day). The staff member will take the child's **Medical Form** with them and will consent to any necessary treatment (as approved by the parents/carers on the **Medical Form**).
- We will contact the child's parents/carers with all urgency, and if they are unavailable we will call the other emergency contacts that we have on file for the child.
- After a major incident the manager and staff will review the events and consider whether any changes need to be made to the Club's policies or procedures.
- We will notify Ofsted and child protection agencies in the event of any serious accident or injury to a child in our care as soon as reasonably possible and within 14 days at the latest.
- We will notify HSE under RIDDOR in the case of a death or major injury on the premises (e.g. broken limb, amputation, dislocation, etc. – see the HSE website for a full list of reportable injuries).

Communicable diseases and conditions

If a case of head lice is found at the Club, a letter will be sent home with all children which will inform parents/carers that they need to check their child's head and treat if necessary.

If an infectious or communicable disease is detected on the Club's premises, we will inform parents/carers as soon as possible.
