

Autumn 1 - Year 3

What a magical and festive half term we have had in Year 3!

English

In English we have started our work around the book 'The Stone Age Boy'. We have used our Historical knowledge from learning about the Stone Age to understand the text and explored cave paintings. We worked as a team to create our own cave drawings taking inspiration from our book. We have also written a non-chronological report by researching about reindeer habitats and diets to inform our writing.

Geography

In Geography we have been learning about the world. We started by studying the location of the world's continents and oceans. We worked as a team to use maps and atlas to locate different countries around the world and studied the human and physical features of the locations.

Design and Technology

In Design and Technology our focus has been on creating a healthy meal. We have used our Science knowledge about a healthy diet to compare different types of soups focusing on their calorie, fat and salt content. We then went on to learn about the different types of soup. After that we evaluated existing products on the market through taste testing and thought about the things we liked and disliked about these products. This research helped us in designing our own soup product which we are looking forward to creating in the new year.

Christmas Festivities

In the lead up to Christmas we have been super busy soaking up the Christmas magic! We started by decorating the school Christmas tree and then we raised the roof with our wonderful singing voices during the carol service. We have enjoyed a delicious Christmas dinner with our friends and participated in Christmas spectacular where we got to do some amazing Christmas crafts. To round off our Christmas celebrations we got to watch a wonderful pantomime performance!

What a wonderful half term it's been!

Keep shining bright Year 3!
